BUSINESS PROCESS MANAGEMENT ENABLED SOLUTIONS THAT WORK FOR YOUR BUSINESS

Business process management has recently crossed the chasm that faces every new technology, and is fast becoming an indispensable tool in every CIO's kit. BPM automates a business's process environment to improve agility and operational performance. When executed well, a BPM solution streamlines company operations within and outside its four walls, and provides flexibility to adapt to changing business rules without heavy reliance on IT.

Comm-IT focuses on a structured BPM approach employing methods, policies, metrics and software tools to continuously optimize our clients' business processes. We offer integrated services across the value chain, including BPM consulting, product selection, custom solution development, application integration and ongoing solution support.

Comm-IT

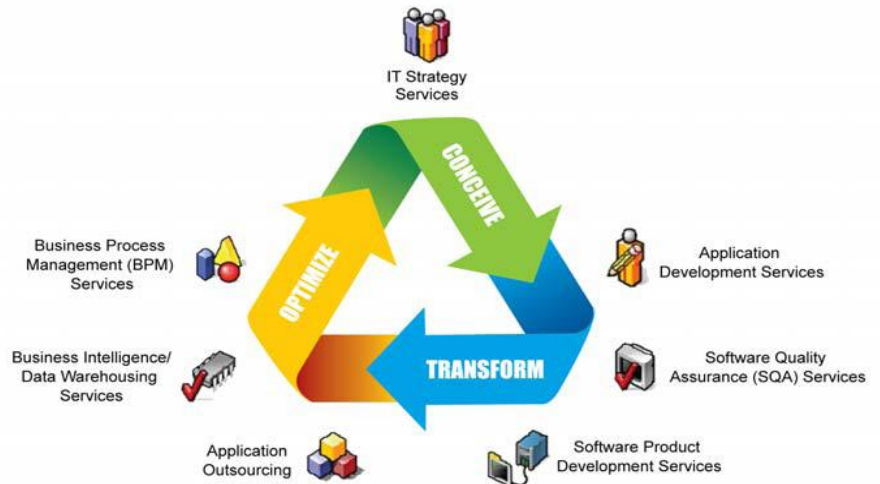

BPM Consulting Partners

Unique BPM Approach

- Providing user-friendly business process modeling and simulation tools
- Enabling people from all parts of the business to work together to turn ideas into solutions
- Teaching people collaborative business process improvement techniques
- Leveraging existing operational systems such as customer relationship management (CRM), enterprise resource planning (ERP) and databases
- Supporting business processes between your business and your suppliers and partners
- Improving your ability to see your core processes
- Empowering managers with the ability to deal with change
- Giving people control, so that operations are consistent across your business
- Allowing processes to improve as business conditions change
