

SERVICES UMBRELLA

BUSINES PROCESS MANAGEMENT

BPM strategy and jumpstart, BPM analysis, BPM implementation and BPM optimization

Custom Application Development

Solution and Platform development, Legacy transformation and migration, Enterprise Application Integration (EAI)

Enterprise Web Application

Enterprise portals, Data integration, Metadata management, Analytics

ERP Implementation- Infor Bann

ERP Implementation for Manufacturing and Logistics companies, Financial Management, Asset management, CRM, SCM, Open SOA

Telecom Solutions

Billing Solution, Self Care Portal, Revenue Fraud Management Solutions, Online Billing and Payment Portal

SYNOPSIS

Client Pepsi India

Problem Statement

- Lack of approval processes
- Delayed decisions
- Lack of visibility

Solution Highlights

- Real-time decisions on approvals on expenditures
- Defined SLAs for alerts and escalations
- Secure portal framework.
- Statistical and analytical reports
- Collaboration between hierarchy
- Identify and Expedite Critical Request.

Technical Platform

- .NET 3.5 Framework
- Microsoft SharePoint server 2007 (Optional)
- SQL server 2005
- Workflow Engine: Option Of Workflow Foundation Server, Skelta Workflow, Fujitsu iFlow

Keeping TAP on your Leaking Cash Expenditures

CAPEX

Capital Expenditure Management solution

With manufacturing and production units being set up across the country; FMCG and Manufacturing companies face the complex process of approvals from numerous managers from across the organization and locations. Critical investment decisions are often delayed or lost in the volumes of paperwork. In addition, approvals over verbal and email communication are creating inconsistency. Management lacks visibility and transparency to see where the requests are pending in the organization tree and expedite the process. The lack of a single, defined process makes the job of tracking and managing capital expenditure requests difficult and time consuming.

Using CAPEX, staff members generate approval requests and managers respond using a single web-based application. Each request is tracked and managed to provide business managers with up-to-date information for all capital expenditure purchases. The application allows each request to be submitted, received, reviewed, approved, tracked, monitored, and reported. Managers are now confident that they are making the right investment decisions within the company's budget -- ensuring that localized objectives are aligned with the company's strategies.
